

A Statement issued on behalf of Indic Pacific Legal Research LLP and the Indian Society of Artificial Intelligence and Law (ISAIL) on the Applicability of the CC BY-NC-ND License on the IndoPacific.app

We are pleased to announce that the digital copies of all technical reports, AI handbooks, and other such previously paywalled works published by Indic Pacific Legal Research LLP and the Indian Society of Artificial Intelligence and Law (ISAIL) will now be made open-access without a paywall.

This decision reflects our commitment to fostering knowledge-sharing and ensuring that our work is accessible to researchers, policymakers, and practitioners worldwide. However, we emphasise that anyone who downloads or refers to our content must properly cite it in accordance with academic and professional standards.

Proper attribution is not only a legal requirement under the Creative Commons Attribution–NonCommercial–NoDerivatives 4.0 International (CC BY-NC-ND 4.0) license but also an ethical responsibility to acknowledge intellectual contributions. This decision comes in light of repeated instances where certain organisations have used our content in their policy and technology reports without proper citation. While we will not name these organisations, we find such practices deeply unethical and unbecoming of institutions that claim to uphold research integrity.

Despite these challenges, we have chosen not to pursue legal action at this time, as our primary focus remains on making our work widely available for the benefit of the broader community. The CC BY-NC-ND 4.0 license will apply to all content available on our platform at IndoPacific.app, including reports, handbooks, and documentation produced by ISAIL. Under this license:

- You are free to download, share, and use our work for non-commercial purposes.
- You must provide proper attribution when referring to or using our content.
- No derivatives or modifications of the original work are allowed without prior permission.

We firmly believe that open access to high-quality research can empower individuals and institutions alike while fostering innovation in law, technology, and policy. We thank our readers for their continued support and trust in our work. For further details on licensing terms, please visit our [Terms & Conditions](#).
